# ST. JUDE CYTOLOGY & ONCOLOGY LABORATORY

DEPARTMENT OF CLINICAL PATHOLOGY | FINE NEEDLE ASPIRATION (FNA) REPORT

## PATIENT DEMOGRAPHICS & INTAKE

Patient Name: Fatima Al-Sayed  Age / Gender: 50 Yrs / Female  Date: 2026-08-22

**Patient ID: Patient-BC-109**  Accession #: ACC-2026-0809  **Status: Final Diagnostic**

## AUTOMATED DIGITAL CYTOMETRY MEASUREMENTS

| iomarker Paramete | Value | Unit | Reference Range | Clinical Flag |
|---|---|---|---|---|
| Cell Size (Radius Mean) | 13.03 | um | 10.0 - 14.5 um | NORMAL |
| ce Texture (Texture Mean) | 18.42 | std | 10.0 - 15.0 std | ELEVATED |
| erimeter (Perimeter Mean) | 82.61 | um | 60.0 - 90.0 um | NORMAL |
| Nuclear Area (Area Mean) | 523.8 | um2 | 300.0 - 650.0 um2 | NORMAL |
| Smoothness (Smoothness) | 0.0898 | idx | 0.060 - 0.100 idx | NORMAL |
| mpactness (Compactness) | 0.0376 | idx | 0.030 - 0.080 idx | NORMAL |
| ntation Depth (Concavity) | 0.0286 | idx | 0.010 - 0.050 idx | NORMAL |
| Indentation Count (Points) | 0.0265 | cnt | 0.010 - 0.040 cnt | NORMAL |

## PATHOLOGIST DIAGNOSTIC IMPRESSION

**Clinical Impression: Benign (Benign Non-neoplastic lesion)**

Cytological Notes: Atypical benign ductal hyperplasia with moderate texture variance but normal margin contours.

Signed: Dr. Marcus Vance, MD, FCAP (Chief of Cytopathology)
